Installation Guidelines

1. HANDLING

- Keep tiles in original packaging to avoid breakage.
- Tiles up to 60x120 cm can be handled manually.
- For larger tiles, use lifting tools or a forklift with appropriate fork length (1.2 m for long side, 2.1 m for short side).
- Handle A-Frames individually.

2. CUTTING

- Use professional dry cutters with intact blades for clean cuts and to prevent damage.

3. BACKGROUND PREPARATION

- Ensure surface is flat, dry, compact, dust-free, and crack-free (max 3 mm deviation using 2 m level).
- Use crack prevention mats if needed. Screed must follow BS 8204-1-2003 or DIN 18560 with moisture \leq 4%.

4. LAYING WITH ADHESIVES

- To be done by qualified professionals.
- Select adhesive based on tile type, surface, and usage. Use C2TES1 cementitious adhesive.
- Apply 3-4 mm adhesive on both floor and tile back. Spread in one direction (shortest side of tile preferred).
- Use U-notch (15 mm) or V-notch (10 mm) trowel.
- Start fixing from the center and press with a rubber mallet to eliminate air pockets.

5. JOINTS

- Plan joint placement carefully: structural, perimeter, tile-to-tile, and material transitions.
- Use 2 mm spacers for consistent alignment, especially with 0.8 caliber tiles

6. TILE LEVELING SYSTEM

Strongly recommended for accurate installation and level surfaces. Also serves as spacers.

7. GROUTING

- Use grout matching tile color. Ensure joints are clean before grouting.
- Apply with rubber trowel. Clean excess grout while still wet using a sponge.
- Avoid contrasting pigments. For epoxy grouts, clean immediately.
- Perform a second cleaning the next day using alkaline detergent.

8. POST-LAYING CLEANING

- Clean tiles 4–5 days after installation, but within 10 days.
- Use acid-based cleaners (no hydrofluoric acid). Test on spare tile first.
- Do not let acid dry on surface. Rinse thoroughly after cleaning.

9. ROUTINE CLEANING & MAINTENANCE

- Use warm water and soft cloths/sponges. Neutral detergents recommended.
- Avoid soaps, waxes, abrasive cleaners on glossy tiles.
- For grease/oil, use alkaline detergents (pH > 9) and rinse well.
- Cover floor post-installation to prevent scratches from ongoing site work.

Cleaning And Maintenance

At Flooret, we understand that your exquisite tiles are not merely flooring; they are an investment in the aesthetic and functional superiority of your space. To maintain their unparalleled beauty and durability, we recommend adhering to these meticulous care instructions, ensuring your indoor and outdoor surfaces remain a testament to refined taste and quality craftsmanship.

Everyday Cleaning: Quick and Easy

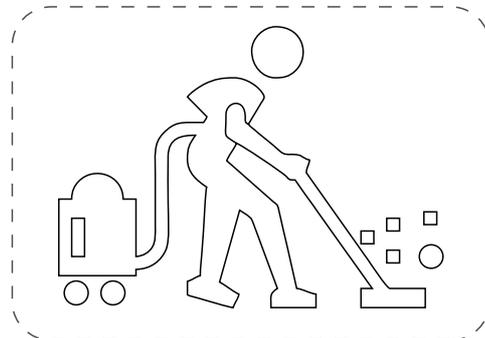

Cleaning your tiles doesn't have to be a pain. Here's what you can do:

- **For everyday dirt:** Just grab a soft mop, sponge, or cloth. Give your tiles a quick wipe, and you're done!
- **Avoid the tough stuff:** Don't use steel wool or hard brushes.
- **Spills happen:** If you spill something, just wipe it up with water and a mild soap. For stubborn stains, use a cleaner that's safe for tiles. Stay away from harsh chemicals like bleach or anything too acidic.

Addressing Stains and Spills

To maintain tiles, blot spills immediately with a clean, dry cloth to prevent stains. Use a tile-specific cleaner for tough stains, testing it first in a hidden spot.

Oil-based stains may need a degreaser. Keep grout clean by scrubbing with a grout cleaner and brush, then rinsing thoroughly. Regular care preserves the look and longevity of your tiles.

Preventing Problems: A Little Effort Goes a Long Way

Here are some easy ways to keep your tiles in top shape:

- **Inside:** Put rugs or mats in busy areas. They catch dirt before it gets to your tiles.
- **Furniture tips:** Put soft pads on the bottom of your furniture legs. This stops scratches when you move things around.
- **Outside:** Use mats at your doors to catch dirt. When you move heavy stuff like planters, lift them instead of dragging them.

Don't Forget the Grout!

The grout is the stuff between your tiles. It needs love too:

- **Clean it:** Use mild soap and water to keep it looking fresh.
- **Watch out for water:** Don't let water sit on your grout for too long, especially outside.
- Enjoy Your Beautiful Tiles!

Taking care of your Flooret tiles is pretty simple. With just a little bit of regular care, they'll keep looking great for a long time. Whether they're in your kitchen or on your table-top, your tiles are built to last. Give them a little attention, and they'll stay beautiful for years!
